Reasons for Allowance

Claims 1, 3-8, 10-14, 19-22, 27 and 29 are allowed.

It is noted that the closest prior art of record, Mault et al. (US Patent Application Publication 2001/0049470 A1), teaches an activity monitoring device using speech recognition, but Mault does not disclose or suggest that the second voice command is implied because a predetermined time from the first voice command elapses before another voice command occurs or because a predetermined ending time occurs and there is no voice command after the first voice command but before the predetermined ending time, and wherein the step of determining a second time comprises the step of assigning the second time as the predetermined time plus the first time, if the first voice command elapses before another voice command occurs, or as the predetermined ending time, if the predetermined ending time occurs and there is no voice command after the first voice command but before the predetermined ending time. Thus, independent claims 1, 19 and 27 are allowable over the prior art of record because the cited prior art alone or in combination, does not fairly suggest or disclose the claimed combination of features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement for Reasons of Allowance."
